

240067106841336

Mr. KIRAN BHAGWAN TAWARE

PID NO: P10424533863650
Age: 56 Year(s) Sex: Male

Reference: DR.PRASHANT ATHALE	VID: 240067106841336
Sample Collected At:	Registered On:
Mahatma Gandhi Mission New Bombay	12/10/2024 07:13 PM
Hsp	Collected On:
Mahatma Gandhi Mission New Bombay	12/10/2024 7:13PM
Hsp Plot # 35 Sector-3 Vashi Navi	Reported On:
Mumbai Mumbai 27-mh 400703 In	13/10/2024 02:28 PM
Processing Location:- Metropolis	
Healthcare Ltd,Unit No409-416,4th	
Floor,Commercial Building-1,Kohinoor	

- Additional laboratory testing (e.g., bacterial culture, immunofluorescence, and radiography) may be necessary when evaluating a patient with possible Central nervous system infection.
- Caution is to be exercised during specimen collection to prevent contamination.
- This test is not intended for use with CSF collected from indwelling medical devices (e.g., CSF shunts).
- Viral shedding into CSF may occur in cases of zoster (shingles; caused by reactivation of VZV). Detection of VZV in CSF may not indicate the cause of CNS disease in these cases.
- Herpesviruses (HSV-1, HSV-2, Cytomegalovirus, HHV-6 and VZV) can exist in latent form that may get re-activated during infection by other pathogens that may cause meningitis/encephalitis. Herpesviruses should be considered as the likely cause of meningitis/encephalitis only in appropriate clinical context & expert consultation.

Associated test:

- Culture & Sensitivity, Aerobic bacteria CSF (Test code C0190)
- Fungal stain, culture and identification CSF (Test code F0084)
- Pneumonia panel (lower respiratory tract) (Test code: B0108)
- Respiratory panel by Filmarray (Test code R0066)
- Gastrointestinal panel by Filmarray (Test code G0324)
- Biofire (BCID) Blood Panel (Test code: B0126)
